Needs and Uses: Collection of the HVS in conjunction with the Current Population Survey began in 1956 and serves a broad array of data users. The HVS provides the only quarterly statistics on rental vacancy rates and homeownership rates for the United States, the

four census regions, the 50 states and the District of Columbia, and the 75 largest metropolitan statistical areas (MSAs). Private and public sector organizations use these rates extensively to gauge and analyze the housing market with regard to supply, cost, and affordability at various points in time.

Policy analysts, program managers, budget analysts, and congressional staff use these data to advise the executive and legislative branches of government with respect to the number and characteristics of units available for occupancy and the suitability of housing initiatives. These data are a component of consumer expenditure statistics. They also are used to project mortgage demand and to measure the adequacy of the supply of rental and homeowner units. In addition, investment firms use the HVS data to analyze market trends and for economic forecasting.

Affected Public: Individuals who have knowledge of the vacant sample unit (landlords, rental agents, neighbors).

Frequency: Monthly.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13, United States Code, Section 182; and Title 29, United States Code, Section 2.
